Dear Sam,

Without beating the horse to death I wanted to give you an illustration of why I think Chuck Keever is very valuable to us. Enclosed is a very rough memorandum he just sent to me. In this you can see he is really taking the bull by the horns here in straightening out our teaching of international law. I've been working on this problem for almost two years. Chuck's memo is the first real tangible progress we have made. I sorely need his continuity to keep this going into the next academic year. I know they are short of lawyers but this is in the name of a good legal cause!

Do appreciate your continued consideration of this. Warm regards.

Yours,

STANSFIELD TURNER
